

Fábio Gomes

Python & Automation Developer

Natal — RN, Brazil

SUMMARY

I build operational automation and internal systems in Python for operations that still rely on spreadsheets, paper and rework. I maintain a hospital automation system in production at the Extremoz City Government (RN, Brazil). My background in IT and process mapping helps me understand the operation before writing code.

EXPERIENCE

IT Supervisor

Extremoz City Government — Extremoz/RN, Brazil · May 2025 – present

Responsible for the internal system of Hospital Municipal Pres. Café Filho and for outpatient billing with SUS, Brazil's public health system.

- I develop and maintain the hospital automation system in production: digital reception, real-time management dashboard and BPA/SUS billing file generation.
- I manage the BPA submission cycle — consolidation, validation and transmission of outpatient production data.
- I use Python to automate routines that previously relied on spreadsheets and manual data entry.

IT Maintenance and Support Technician

Extremoz City Government — Extremoz/RN, Brazil · March 2021 – April 2025

- Workstation maintenance, formatting and setup.
- Installation and upkeep of local networks and peripherals.
- Day-to-day technical support for users.

Customer Service Agent

Teleperformance Brasil — São Gonçalo do Amarante/RN, Brazil · November 2018 – July 2022

- Inbound customer service, focused on first-contact resolution and accurate case logging in the system.

PROJECTS

HMPCF Automation System — hospital automation system running in production: digital reception, management dashboard and BPA/SUS billing. FastAPI, PostgreSQL, React, Streamlit, Docker.

BarrioERP — multi-tenant SaaS ERP for restaurants. FastAPI, SQLAlchemy 2.0 (async), PostgreSQL, React and TypeScript, running on Docker, with role-based access control (RBAC) and optimistic locking to protect the financial integrity of open tabs.

Student Dropout Prediction — data engineering with Python and Pandas feeding an interactive Streamlit dashboard.

TECHNICAL SKILLS

Back-end

Python, FastAPI, Flask, PostgreSQL

Data

Pandas, data cleaning and analysis

Infrastructure

GNU/Linux, Docker, Git

Front-end

HTML5, CSS3, React (basics)

EDUCATION

Technologist Degree in Systems Analysis and Development

Centro Universitário Senac

August 2025 to August 2027 (in progress)

CERTIFICATIONS

Python Essentials 1 · Introduction to Data Science · Linux Unhatched · Computer Hardware Basics · Logistics Technician

LANGUAGES

Portuguese (native) · English (technical reading)
